Infinite Storage

Let your storage grow as your data grows.

Data generation, data processing and data analytics are critical business capabilities that drive enterprise innovation to better store, protect and manage data.

The constant change and growth of information means organizations need to evaluate more data in less time, speeding processes companywide. Data insights combined with business agility are key to forming new competitive advantages and generating value faster. Companies are faced with ongoing challenges, like how to ensure the right technology resources are available to support business demands while protecting customer data sovereignty, privacy, meeting residency requirements, and complying with regulatory & governance policies; how to align deployed storage capacity to actual usage to remain cost-effective; or how to avoid overprovisioning without risks.

Lenovo TruScale Infinite Storage is *engineered to overcome* these challenges.

Infinite Storage

A truly elastic, pay for what you use solution

Lenovo TruScale Infinite Storage is on-premises file, block, and object, as a Service solution, with built-in technology refresh, deployed at your data center or colocation facility with lifecycle management by Lenovo experts.

Lenovo TruScale Infinite Storage incorporates perpetual as-you-grow expansion for performance and/or capacity, with no preset limits. Expansion and refresh is non-disruptive, eliminating the need for additional capital investment and costly effort intensive forklift upgrades.

Our solution enables you to:

✓ Accelerate innovation, simplify operations, and increase agility
   Always the latest performance with built-in technology refreshes every 3 years – optimize your business to accelerate innovation, simplify operations, and increase agility.

✓ Meeting data localization, regulatory, and audit requirements
   Get the agility and flexibility of public cloud storage with the security and performance of on-prem storage.

✓ Avoid over provisioning – convert your risk into savings with our hybrid cloud model
   Only pay for the capacity that's used to avoid over provisioning – convert your risk into savings with our hybrid cloud model.

Benefits

✓ Get started fast — without IT capital expenditures and IT lead times, you control your data, Lenovo manages the underlying infrastructure.

✓ Flexible commitment, scale up and down effortlessly with no need to increase your minimum commitment as usage increases.

✓ True consumption billing model: pay for what you use and not for what is provisioned.

✓ Seamless, instant scalability from day 1 with right sized environments and additional pre-deployed capacity.

✓ Automatic Cloud Tiering. Manage and control your data efficiently and securely.

Just-in-time Storage rather than just-in-case Storage

When looking for secure, highly reliable on-premises storage with a cloud-economics model, go with TruScale.

1. **A managed solution** From Installation to Operation, including proactive Health Checks of the Infrastructure, so that you can focus your business resources on higher ROI initiatives.

2. **Better together** Lenovo ThinkSystem DM Series Storage Systems have built-in software that is compatible with Legacy Cloud and Public Cloud environments, reducing the efforts to manage your workloads.

3. **AIOps** Cloud-based management platform to simplify and automate your ThinkSystem Storage environment for reduced risks, and higher availability.

4. **Right Size for any Workload** Our expert team of storage consultants will work with you to evaluate your business needs and architect a solution that meets your demands, from day 1 to day ∞.

AGILE
Full elasticity to grow your infrastructure as your data and business grows.

FLEXIBLE
Flexible commitment, where usage and billing can go both up and down.

SECURE
On-prem in your data center, with your firewall and security controls.

FULLY MANAGED
End to end services including installation, deployment, configuration, and managed services.
